

Forgiveness Goblets

By Blue Ridge Pottery

As each of our goblets is unique in its design, forgiveness goblets are very unique in their purpose. In all marriages, arguments and disagreements occur. Tears, harsh words, and silence may result. When two are angry with each other, one should fill the goblets with a beverage of choice and offer a goblet to the other. The drinks are shared together as the couple talks through their misunderstanding and forgive one another. Who is right or wrong is irrelevant. What matters is the compassion shown as husband and wife. So, please select your goblets and pass this beautiful story on to another.
